INLAND WATERS

<p>The Journal of the International Society of Limnology is an international, peer-reviewed journal for original papers that advance our understanding of inland aquatic ecosystems and their management. It is not restricted to SIL members.</p> <p>This journal replaces the SIL Proceedings (Verhandlungen), but will remain as faithful as possible to the niche that SIL occupies, with encouragement of a worldwide set of authors and short (except for papers arising from named and plenary talks at Congresses), rapidly published papers. The scope of the journal includes all aspects of physical, chemical, and biological limnology, as well as applied and regional limnology.</p> <p>Inland Waters publishes papers online consecutively, and then in four (4) print issues per year. To view the journal or submit a manuscript, visit the SIL website: (limnology.org). SIL members are entitled to free online access as part of their membership.</p>
